

EUBerry WP2 meeting at Bioforsk Grassland and Landscape Kvithamar, Stjørdal, Norway, Wednesday, September 25, 2013.

08.30 Status of tasks

- Task leaders: short presentations of the progress in tasks
Pedro – not attending the meeting
Rolf
Gijs

09:10 Cooperation between WP2 and other WPs

- cooperation and plans between WP1 and WP2, WP2 and WP3. Päivi
- Cooperation between WP2 and WP4. Peter Roelofs will attend the meeting and make an introduction to the discussion.

10:00 – 10:20 Coffe/tea

10:20 Continue

12:00 -13:00 Lunch

13:00 Discussion of WP2 deliverables

D2.1. Develop method to use LED (P2, P8) (D month:22=FEB 2012).

D2.2. Develop methods to modify strawberry plant architecture in nursery production (P1, P2, P6, P8, P9, P14), to avoid summer hot temperature for strawberry and raspberry in S Europe (P1, P13, P14) and understanding of berry physiology affected by environment in C and S Europe (P14, P10), flower-bud differentiation and chilling requirement (P8). (D month:34=FEB 2014)

D2.3 Methods for improved propagation, plant protection and resource use efficiency in berry (P1, P2, P6, P7, P8, P9, P11, P13, P14). (D month:36=APR 2014)

D2.4. Methods to modify growth conditions in tunnels for season extension (P1, P2, P8, P11, P13, P14). (D month:38=AUG 2014)

D2.5. Develop methods for crop season extension of raspberry in C and N Europe and blackberry and blueberry in S Europe (P2, P8, P14). (D month:40=OCT 2014)

15:00 Coffe/Tea

15:00 **What is ahead?**

- Dissemination activities
- Meetings

16:00 **Finish**

- For those interested (not running for the plane or train) there is an opportunity to walk down to the small tunnel area. Most of the area will be prepared for the coming winter, but the primocane raspberry will still be running (unless some extraordinary weather appears). And Jahn Davik have some activity within WP1 (freezing tolerance and mildew) which he would like to present (In greenhouse).
